

EV CHARGEPOINT SOLUTIONS

Home Flex Plug

A wall outlet just doesn't cut it anymore. Add up to 37 miles of Range Per Hour to your EV with ChargePoint® Home Flex, a 240-volt Level 2 home charger that delivers up to 50 amps of power.

CT4021 6' Bollard Dual

The CT4000 family is the latest generation of Charge Point commercial charging stations. Refined yet rugged, these stations set the industry standard for functionality and aesthetics. CT4021 is a Dual port bollard charging station with 18' charging cables.

CPE250 Station

The Express 250 is ideal for businesses near interstates and major roadways to provide EV drivers with quick-turnaround charging. Express 250 stations can also be used to complement CT4000 stations at workplaces, giving employees a fast way to top up when they need it.

Express Plus Platform

The Express Plus is a future-proof, scalable DC fast charging platform that grows with demand and is designed to meet the needs of businesses and vehicles now and in the future. The modular, scalable architecture delivers up to 350 kW to a single vehicle.

and much more...
